

JUAN DIEGO NEGRETE PORTILLO

Systems Engineering Student · Full Stack Developer — Java · Python · SQL · React · Node.js · QA Tester

Montería, Córdoba, Colombia | +57 320 959 4155 | juandinegrete2006@outlook.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Ninth-semester Systems Engineering student at Universidad de Córdoba, with hands-on Full Stack development experience (Java, Python, JavaScript, SQL, React, Node.js) and real-world software QA experience as an official Beta Tester for the video game SuperWorldBox, credited by the studio. C1 English proficiency with proven ability to work in remote, international teams. Seeking a Junior Developer or QA Tester role where I can bring technical rigor, fast learning ability, and a strong commitment to software quality.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL, PHP

Full-Stack Development: React, Node.js, HTML5, CSS3, Express, Angular (basic), Laravel (basic)

Databases: MySQL, PostgreSQL — schema design, queries, and relational modeling

Testing & QA: Functional beta-testing, bug reporting and documentation, mechanics and regression validation, manual testing

Version Control: Git, GitHub (personal and collaborative repositories)

Tools & Environments: Visual Studio Code, IntelliJ IDEA, PyCharm, NetBeans, Chrome DevTools, command line (CLI)

Methodologies: Scrum, Kanban, collaborative work in remote teams

Other: Semi-professional video editing, technical English–Spanish translation, online community management

PROFESSIONAL EXPERIENCE

Beta Tester & Video Game Translator (English–Spanish)

January 2022 – Present

Maxim Karpenko Studios (SuperWorldBox) — Remote

- Ran functional and regression testing on new builds of the video game SuperWorldBox ahead of its official Steam release.
- Identified, documented, and prioritized bugs through structured technical reports, working directly with the development team to reproduce and verify fixes.
- Validated game mechanics and systems balance, contributing to the overall stability and quality of the product.
- Translated in-game content from English to Spanish, ensuring terminology accuracy and consistency with the user experience.
- Officially credited in the game's credits as a team tester, reflecting real-world QA experience in an international, remote environment.

EDUCATION

Systems and Telecommunications Engineering

March 2023 – December 2027 (in progress, 9th semester)

Universidad de Córdoba — Montería, Colombia

English Course — C1 Level

2017 – 2025

Universidad de Córdoba — B2+ certified, current level C1

CERTIFICATIONS

100 Days of Code: The Complete Python Pro Bootcamp (57 hours)

Udemy · 2025 – Present

- Built 100 hands-on Python projects: automation, scripting, web development with Flask, REST APIs, web scraping (Selenium, BeautifulSoup), data analysis (Pandas, NumPy, Matplotlib), and game/desktop app development (Tkinter).
- Applied version control with Git/GitHub and application deployment (Heroku, GitHub Pages).

Advanced Java Certification — 150 hours

Udemy · 2025 – Present

- Modern Java (JDK 21), object-oriented programming, design patterns, JDBC, and development of desktop, web, and enterprise applications.
- Projects using Spring Boot, Hibernate, Jakarta EE, JSP/JSF, Thymeleaf, Angular, and React; security, REST services, and MVC/DAO/Factory architectures.

Complete Web Development: HTML5, CSS3, JS, AJAX, PHP and MySQL — 83 hours *Udemy · 2025 – Present*

- Full-stack development from scratch: HTML5, CSS3, SASS, JavaScript (Fetch/AJAX), object-oriented PHP (MVC), MySQL/SQL, and API consumption.
- Implemented secure authentication, session management, payment gateways, and MVC architecture in dynamic applications.

Full-Stack Developer Certification

Mimo · 2023 – 2025

- HTML, CSS, JavaScript, building SPAs with React, creating APIs with Node.js/Express, and managing SQL databases.
